

Information on total number of voting rights and shares composing the share capital as at March 31, 2018

Paris, April 3, 2018 – 6.00PM CET - Pixium Vision (FR0011950641 - PIX), a company developing innovative bionic vision systems to allow patients who have lost their sight to lead more independent lives, announces the evolution of its share capital. The number of voting rights and shares composing its share capital as at March 31, 2018 is as follow:

Total voting rights	Total number of shares composing capital
Total real voting rights ⁽¹⁾ :	15,102,056 ⁽³⁾
15,062,301	
Total theoretical voting rights ⁽²⁾ :	
15,102,056	

(1): The actual (or net) voting rights correspond to the total number of voting rights exercisable at General Meetings. They are calculated based on the total number of voting rights attached to the total number of shares, less any shares without voting rights (treasury shares, etc.). Based on treasury shares as from December 31, 2017

(2): Theoretical (or gross) voting rights include all voting rights attached to the shares (including those without voting rights).

(3): Including 1,290,000 new shares in accordance with the contract of Equity Line financing concluded with Kepler Cheuvreux on October 23, 2017

ABOUT PIXIUM VISION

Pixium Vision develops bionic vision systems for those who have lost their sight, enabling them to regain partial visual perception and greater autonomy. Pixium Vision's bionic vision systems combine advanced medical technologies, bio-electronic and optical engineering and digital technologies to recover visual perception. Pixium Vision's bionic vision systems are associated with a minimally invasive surgical implantation followed by a training and readaptation period. Pixium Vision has developed PRIMA, a new generation sub-retinal miniaturized photovoltaic wireless implant system, for patients suffering atrophic dry age-related macular degeneration (dry AMD), a large unmet medical need, resulting in central vision loss for the elderly. PRIMA is in clinical trials in France and in the USA. Pixium Vision collaborates closely with academic and research partners spanning across the prestigious vision research institutions including the Institut de la Vision in Paris, Stanford University in California, Moorfields Eye Hospital in London, and Institute of Ocular Microsurgery (IMO) in Barcelona. The company is EN ISO 13485 certified.

Pixium Vision is qualified "Entreprise Innovante" par Bpifrance
